

Citywide On-Call Engineering Services for Stormwater

Albuquerque, New Mexico

Client

City of Albuquerque

Highlights

- ◆ Projects include stormwater quality, LID, green infrastructure, and drainage/flood control
- ◆ Permitting assistance for NPDES/MS4
- ◆ Fast-track schedule

The City of Albuquerque selected DBS&A for the Citywide On-Call Engineering Services for Stormwater contract.

The contract includes preparing reports, conceptual designs, plans, specifications, and estimates for various projects—including stormwater quality, low-impact development (LID), green infrastructure, and stormwater drainage/flood control projects—on a fast-track schedule.

DBS&A is assisting the City in the management of National Pollutant Discharge Elimination System (NPDES) compliance efforts for the Albuquerque Municipal Separate Storm Sewer System (MS4) permit. In addition, DBS&A's scientists and engineers are providing technical expertise in all aspects of permit compliance, including water quality monitoring and pollutant mitigation.

Deliverables for the on-call contract include surveys, utility locates, engineering studies, drawings, and public meeting materials.
